Title: Equipment Authorizations

FR Document Number: 2015-21634

RIN:

Publish Date: 9/1/2015 12:00:00 AM

Submitter Info:

First Name: kienan

Last Name: vella

Mailing Address: 1617 Victoria Park Avenue

City: Scarborough

Country: Canada

State or Province: Ontario

ZIP/Postal Code: M1R 1P5

Email Address: kienan.vella@gmail.com

Organization Name:

Comment: Please, I implore you, Do not implement rules that take away the ability of users to install the software of their choosing on their computing devices not limited to routers, cellular phones, and computers. Preventing the installation of other operating systems on PCs and phones would essentially kill more than a full quarter of the PC market, and nearly all of the consumer and corporate wireless network technology vendors - Both markets worth billions of dollars.

Research into wireless communications protocols and wireless devices depends on this, and many businesses depend on being able to use the software they choose to host 802.11 (wifi) networks.

Preventing researchers from working on wireless communications will effectively prevent wireless security vulnerabilities from being discovered and ultimately patched.
